The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-24425

Stream : Pond Flat Ditch

Applicant : Vanderburgh County Surveyor

Bill Jeffers

Room 325, Civic Center

1 Martin Luther King Boulevard Evansville, IN 47708-1887

Description : Approximately 3100' of channel will be reconstructed and widened. The channel

will be enlarged to an average depth of 10.5', width of 10' and side slopes of 3:1. Also 10 existing outfall strucutres will be replaced. Details of the project are contained in information and plans received at the Division of Water on July 26,

2007.

Location : Along both banks of Pond Flat main Ditch beginning 30' east of CSX railroad and

continuing upstream to US Highway 41 for approximately 3100'

DOWNSTREAM: near Haubstadt, Scott Township, Vanderburgh County

Application # : FW-24428

Stream : Maumee River

Applicant : Allen County Highway Department

Bill Hartman

1 West Superior Street Fort Wayne, IN 46802-1299

Description : A new bridge will be constructed over the Maumee River to carry Maplecrest

Road across the stream. The new structure will be a 7-span prestressed concrete bridge with span lengths of 123', 5 @ 135', and 123'. The structure will have an out-to-out length of 65.33' and a clear roadway width of 52'. The spill through abutments will have 2:1 sideslopes armored with revetment riprap. The abutments and piers will be skewed 35 degrees to align with streamflow. The approach roads will be elevated a maximum of 22' above the existing grade. The project is partially federally funded. Details of the project are contained in

information received electronically at the Division of Water on July 27, 2007 and

in plans and information received at the Division of Water on

Location : At the Maplecrest Road crossing

near Fort Wayne, Adams Township, Allen County Section 3, T 30N, R 13E, Fort Wayne East Quadrangle

Stream : Unnamed Tributary

Nineveh Creek

Applicant : Camp Atterbury JMTC

William Ochsner

Camp Atterbury JMTC

DPTM

Edinburgh, IN 46124-5000

Description

The proposed project would install cable concrete mats and riprap to harden and stabilize a stream crossing. The area impacted below the ordinary high water mark will be 496 square feet. 240 square feet of this will be exposed riprap and the remaining 256 square feet will be cable concrete. The crossing will be excavated to a depth of 24.5 which will result in the installed materials being at the same elevation as the existing stream bed. Geotextile fabric will be placed between the stream and the riprap sub-base. The sub-base will consist of 8" of 6" riprap and 8" of 2" riprap on top of which the cable concrete will be keyed into the upstream side. An apron of 6"- 8" riprap will be placed 10' out on the upstream side of the cable concrete which is then followed up by 5' of 6" - 8" riprap on the downstream side. Standard erosion control practices will be utilized during and after construction including: silt fencing, and hydro seed mulch with native vegetation. Details of the project are contained in information received electronically at the Division of Water on July 27, 2007 and in plans and information received at the Division of Water on July 30, 2007.

Stream : Elkhart River

Applicant : Elkhart County Parks

Larry Neff

211 West Lincoln Avenue Goshen, IN 46526-3280

Description :

The purpose of the project is to provide stabilization and prevent further erosion on a steep slope of the Elkhart River. Approximately 310 linear feet of the eroded streambank will be stabilized. Large diameter crushed limestone rip rap will be used to fill in scour pit areas and will be placed along the bank for toe protection from an elevation of 760 to 761, an embankment shelf will be created. Approximately 1550 cubic yards of rip rap will be placed below the ordinary high water mark. Topsoil will be installed on the embankment shelf to promote establishment of native vegetation along with native trees and shrubs. Native seed will also be installed above this shelf on the 2.5:1 streambank slope. A 20 percent-slope access ramp will be created for use during construction. Details of the project are contained in information received electronically at the Division of Water on July 31, 2007 and in plans and information received at the Division of Water on

Lake : Cline Lake

Applicant : Senator Robert Meeks

5840 East 025 North

LaGrange, IN 46761-9519

Description : A new bioengineered seawall will be constructed across 180' of the applicant's

frontage. The new seawall will be constructed using glacial stone and live stake plantings. The joint planting method will be used. Button Bush, Bristly Sedge, Red-Osier Dogwood or other plants approved by the Division of Fish and Wildlife will be planted at and above the waterline. Rush, pickerel weed and other emergent wetland plants native to the lake will be planted at or below the waterline. The joint planting method will be used. Some minor regrading of the bank will be needed to accommodate the project. Details of the project are

contained in information and plans received at the Division of Water on July 24,

2007 and August 1, 2007.
